

Introduction

The Mobile Phone Sales Analysis project is developed using Power BI to analyze mobile phone sales performance and revenue trends. The project provides insights into product performance, customer segments, sales channels, payment types, operating systems, and geographic markets. The dashboard transforms raw sales data into interactive visualizations to support better business understanding and data-driven decision-making.

Objective:-

The main objective is to analyze mobile phone sales data and identify sales trends, top-performing brands and mobile models, high-performing countries and cities, major sales channels, payment types, and customer age groups. The analysis aims to understand the factors contributing to revenue and provide meaningful insights for business decision-making.

Dataset:-

The dataset includes the following column headers:- Transaction ID, Transaction Date, Mobile Model, Brand, Price, Units Sold, Total Revenue, Customer Age, Customer Age Group, Customer Gender, Country, City, Sales Channel, Payment Type, Storage Size, Color, and Operating System.

Business Questions:-

1. What is the total revenue?
2. How many transactions ?
3. How many mobile units were sold?
4. What is the average selling price?
5. What is the MoM growth percentage?
6. How many brands ?
7. How many mobile models?
8. How many cities ?
9. How many countries ?
10. Which sales channel has the highest revenue?
11. Which payment method has the highest contribution?
12. Which age group generates the highest revenue?
13. What is the relationship between revenue and units sold across different brands?
14. Which operating system generates more revenue?
15. Which month has the highest revenue?
16. Which brand generates the highest revenue?
17. Which brand has the highest units sold?
18. Which mobile model generates the highest revenue?
19. Which storage size generates the highest revenue and unit sold?
20. What are the top 5 mobile models by units sold?
21. Which country has the highest revenue?
22. Which city has the highest revenue?
23. Which country has the highest units sold?
24. Which operating system generates more revenue in each country?
25. Which sales channel generates the highest revenue in each country?

Total Revenue by Country and Operating_System

- India is the top-performing country, generating approximately 5.97M in revenue and 7.3K units sold, the highest among all countries.
- Online is the leading sales channel, contributing approximately 7.5M in revenue, significantly higher than Retail Store (3.2M) and Partner (1.4M).
- EMI and Credit Card are the most preferred payment methods, contributing approximately 26.27% and 26.12% of total revenue, respectively.
- Samsung is the highest-revenue-generating brand, with approximately 3.15M in revenue.
- Android dominates iOS in revenue contribution, accounting for approximately 75.86% of total revenue.
- The 26–33 age group generates the highest revenue, at approximately 2.39M, followed closely by the 42–49 age group at 2.31M.
- The Z Fold 6 is the top revenue-generating mobile model, contributing approximately 1.60M.
